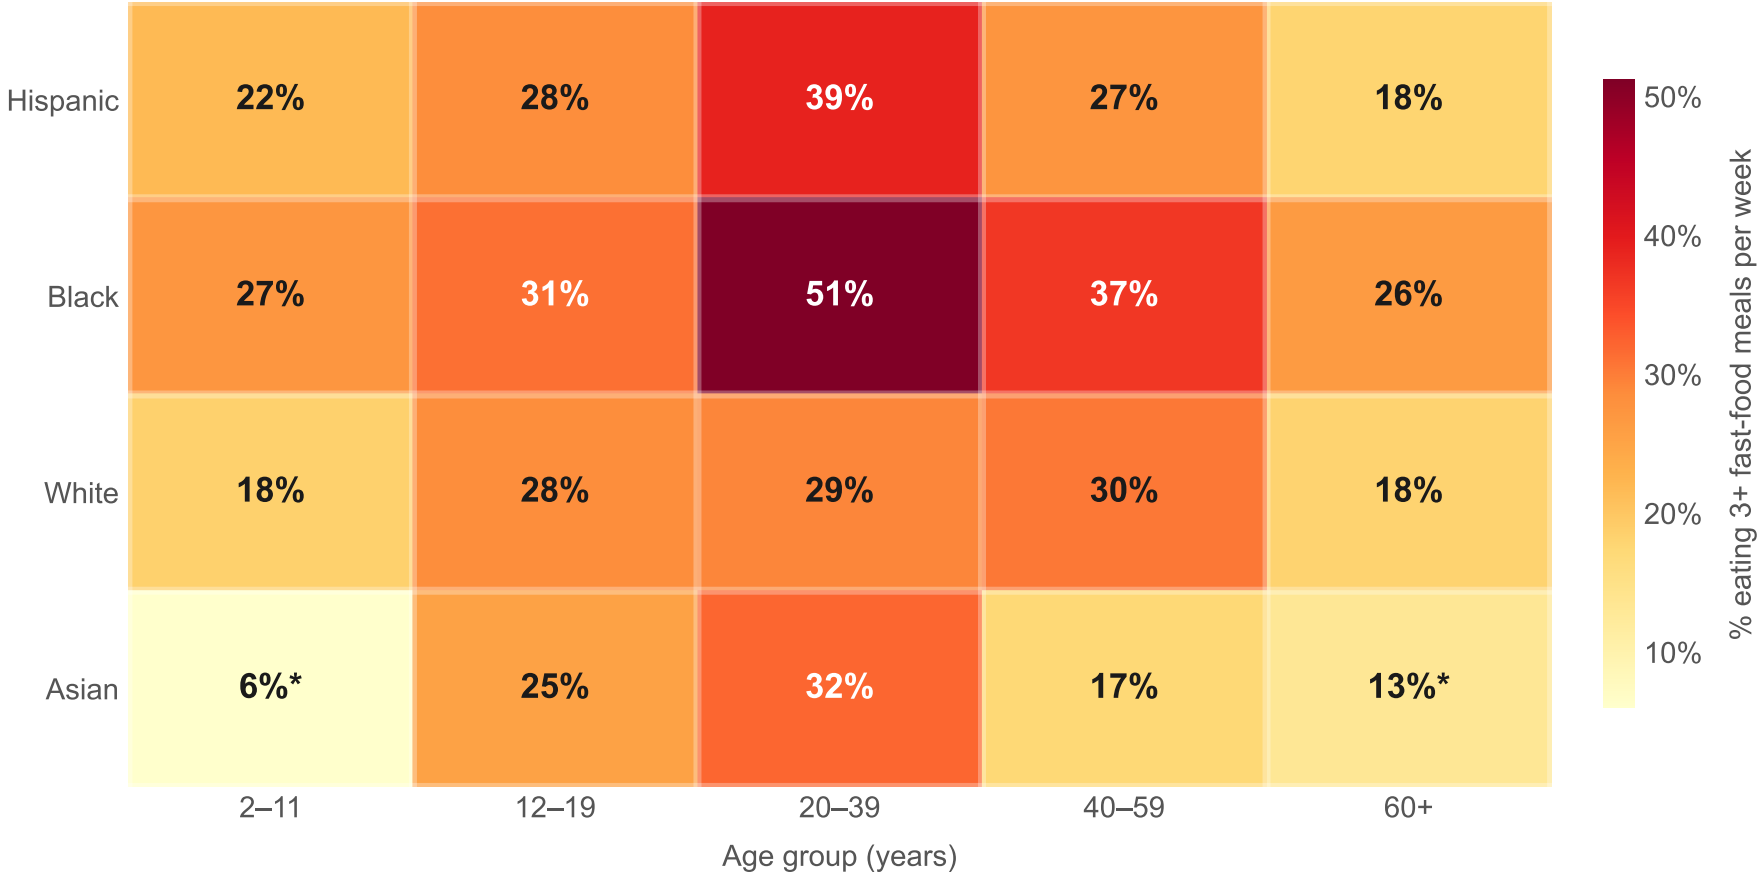
Who eats fast food most often?

Share of each group who ate 3 or more meals from a fast-food or pizza place in the past 7 days. Darker cells mean more frequent fast-food eating.



Source: NHANES 2017–2018, Day 1 24-hour dietary recall. Survey-weighted estimates. Excludes breastfed children. Hispanic = Mexican American + Other Hispanic; Black, White, and Asian = non-Hispanic. Other/multiracial participants not shown. * Relative standard error above 30%; interpret with caution.
